WHITEPAPER

DISCLAIMER

Any terminology used in this Whitepaper, on the Website or within the app is intended only as a basic reference, without any effective or legal meaning of the same terms in a regulated and/or financial environment. BIGCASH token is a fully and completely decentralised and community driven project and does not have owners, shareholders, promoters, marketers, managers, directors or other figures or entities exerting any form of governance; the BIGCASH token smart contracts are open-source, security audited, permanent and non-modifiable in any way. The BIGCASH token is a strictly utility token in any jurisdiction and is not and can not be considered as a security or otherwise a regulated token of any kind, is not in any way e-money and/or a fiat or asset backed stablecoin, whether global or limited in scope. This Whitepaper taken by itself is not a contract or a contractual agreement of any kind, is not an invitation, solicitation or offer to invest in BIGCASH or acquire or use its BIGCASH tokens in any way and with any expectation of profit in any form. Any user of BIGCASH declares to have received appropriate technical, administrative, regulatory and legal advice before and after accessing and/or reading this Whitepaper, the website and using any portion or element of BIGCASH (including any BIGCASH token there in) and accepts that there is an inherent high risk in accessing, acquiring or using any kind of blockchain and/or crypto system, token, platform, software, interface including BIGCASH and further acknowledges with full disclaimer for any community member directly or indirectly involved with BIGCASH TOKEN, that there can be any kind of damage suffered, including total loss.

WHY DECENTRALISATION ?

We are in Blockchain era.

Until now, centralization has been a prerequisite for all of our official structures. Political, educational, and financial systems are, and have always been, crafted in a way that does not equally and ethically distribute power to those functioning within them. There may have been times in history where this sort of internal configuration played an important role, but, in an age with the information of the world available at the click of a button, it's time to rethink. 2021 opened our eyes to how little control the average person has in the face of these overarching, generational structures when GameStop and AMC stock value exploded seemingly overnight. Wall Street Bets tested the waters of what it would look like to disperse control to consumers and inexperienced investors alike. It was inspiring, but it didn't last long. Just when the movement seemed to be on the brink of success, it was throttled by the bureaucracy of our centralised society. Cryptocurrency itself comes from the idea of disrupting routine and redefining how wealth can be acquired, which goes against traditional processes by its very nature. And yet, most, if not all, cryptocurrencies function within a system of enforceable rules. It's easy to see when we look back at cases like the SEC's win over the Kin Ecosystem (a centralised authority), or when we consider how the Binance Smart Chain seems to use centralised authority to offer "benefits" over their decentralised partnerships. In the ever-shifting economic landscape, cryptocurrencies which do not take their independence into their own hands struggle with a tenuous existence. When the rules of the game are changed against their favour, they have no option but to comply; regardless of the consequences.

But not BIGCASH.

ABSTRACT

Scalable, Interoperable & Decentralised Network for the next web

BIGCASH token was created in Nov 2018 with the goal of being a first Malaysian Crypto Exchange but due to corona pandemic and long legal identity process we finally moved to completely decentralise project .

BIGCASH mission is to bring popular cryptocurrency concepts to the mainstream. Unlike older, comparable projects, BIGCASH introduces holders to next-gen concepts such as participation rewards, decentralised exchanges, payment network and more.

Within the first month of its launch, BIGCASH made history by surpassing a \$1 million market cap and over 10,000 holders. This was an unprecedented milestone for a project of its kind, and proved the world's belief in the project. BigCash Is only 50 Million limited supply which make more valuation.

The BIGCASH Token project includes....

BIGCASH TOKEN

An ERC20 meme token that fosters and promotes healthy and widespread usage and decentralisation of the project through a specific reward linked to users' transactions involving decentralised wallets.

GIGA SWAP

Decentralised exchange that features custom functionality and allows holders to trade among themselves and without any centralised point of failure any ERC20 token for another.

K PAY

Kpay has been made to advance cryptocurrency wallets and exchanges into the exciting and disruptive industry that it is today. Yet, the desire remains for a user-focused experience to buy, sell, and use cryptocurrencies in a safe, convenient, and reliable application.

CROT-MYRT

The MYRT is a digital token worth equal or more than a Malaysian Ringgit (MYR). MYRT is potentially worth more than the Ringgit . Once our ICO is concluded, our customers will be able to sell MYRT on our website and will receive ETH and BTC— in equal value in MYR or USD.

VALUES

TRANSPARENCY & COMMUNITY

BIGCASH Token will be ownerless, fully decentralised and supported by its community of enthusiasts. Free, open and frank communication is encouraged within the community supporters so that everyone willing can be informed and even participate in every step of BIG CASH growth! Multiple, independent, free group efforts in development, community self-management and more are strongly encouraged!

TRUST

In the cryptocurrency market, Trust is paramount. That means full transparency not only in the community support and development, but also in any security effort. Examples include top-grade audits of BIGCASH Token code, and liquidity tokens being burnt to strongly reduce any risk of malicious behaviour.

LONGEVITY

BIGCASH Tokens are in it for the long haul. The decentralised community is fostering long-term development of the ecosystem which will result in real use cases, greater rewards and a popularity beyond any temporary trends.

BIGCASH TOKEN

BIGCASH TOKEN is an ERC20 token which started on the Ethereum blockchain Nov 21, 2021.

The max supply is 50 million and one of its key functionalities is its decentralised usage rewards mechanism. For every active user transaction a 1% BIGCASH reward is granted to holders' decentralised wallets only, fostering a healthy distributed network and community usage. The more BIGCASH is actively used, the more rewards are granted!

The BIGCASH Token Smart Contract successfully passed a top-grade security audit to further the community's confidence, in full transparency.

BIGCASH is a fully decentralised and community driven project - BIGCASH liquidity pools and listings are constantly added by many completely independent enthusiasts and supporters in a number of different exchanges, among which:

EXCHANGES

- GIGASWAP = BGC/ETH
- UNISWAP = BGC
- BITUBU = BGC/UDST
- PANCAKESWAP = BGC/USDT
- GIGASWAP = BGC/MYRT

...and many others thanks to our active and diverse community!

GIGA SWAP

BGC, MYRT came together to create GIGA Swap, the next evolution in DeFi platforms. GIGA Swap gives users the ability to provide liquidity, stake, and SWAP tokens .

GigaSwap plans to disrupt the cryptocurrency industry by providing a superior alternative to traditional web-based decentralised crypto exchanges and wallets. By building a comprehensive, secure, and intuitive crypto wallet with buy, sell, convert, and management capabilities, GigaSwap aims to deliver the ideal solution.

ECOSYSTEM

GIGA SWAP

Decentralised exchange that features custom functionality and allows holders to trade among themselves and without any centralised point of failure any ERC20 token for another.

THE FUTURE OF GIGASWAP

FUTURE DEVELOPMENT

To assure the longevity of GIGASWAP and the BIGCASH Ecosystem, a part of the minted KPAY will be allocated to a multi-signature-activated Development wallet. This wallet will be split in 80%-20% during the first 14 days, then 50%-50%.

Core Developers & OG Admins Fund

This fund will be put towards the financial relief that our Dev team needs to make our Ecosystem their full-time focus. We want these talented individuals to continue building on the solid foundation they gifted to us with their own time, money, and energy.

This allocation will allow each of the volunteer developers to be both compensated for their initial investment into GIGaSwap, and also offer salaries so they can work exclusives in the Ecosystem.

This fund allows the Development team to have a trusted group of admins, deployed across multiple channels, to secure a safe space where BIGCASH fans build community without being bothered by FUD, scams, and other issues.

BIGCASH In Ecosystem Development & Marketing Fund

This fund will be put towards the continued advancement of our BIGCASH Ecosystem.

This funding will also allow us to quickly expand on concepts from the top secret 2021 GigaSwap with a real budget. Upon the completion of GigaSwap items, we will utilize the remaining funds to complete the projects confirmed by the Community.

Governance votes for 2022 and 2023.

The BGC Ecosystem is even more impressive when you consider that, so far, the entire effort has succeeded without spending a dollar on marketing.

However, this Kpay will allow the team to deploy international marketing strategies, such as commercials, that will make BIGCASH the freshest mainstream cryptocurrency name, sharing the ranks with Bitcoin and Ethereum.

THE VISION OF GIGASWAP

We are dedicated to building the best Decentralized Ecosystem (DECO) on the planet. Our three tokens were the seeds from which the BIGCASH Ecosystem sprouted, and GIGA SWAP is how they've dug in their roots.

The goal of GIGASWAP is to provide a safe place to trade your valuable crypto while remaining decentralized. We are loyal to our holders, and that gives us the means to grow exponentially. We will constantly scale this Ecosystem so it may bring ever-increasing interested parties to the GIGASWAP platform.

Our unique tokenomics, solid design, technical implementation, and the viral growth from our good 'ole fashion memes, will reinforce the platform's strength and ultimately provide residual benefits to the Ecosystem. Making a swap without a budget is a unique challenge, but by tackling various genres and product lines we will build a focused development team from the community.

We know that with our unified force, and the power of BIGCASH, we will be successful in advancing the Swap and Ecosystem as a whole, so that we reach new and spectacular heights together. The best is yet to come!

K-PAY

Kpay has been made to advance cryptocurrency wallets and exchanges into the exciting and disruptive industry that it is today. Yet, the desire remains for a user-focused experience to buy, sell, and use cryptocurrencies in a safe, convenient, and reliable application .

ROADMAP

PHASE 1 - LAUNCH

- 1,000 Holders
- Website Launch
- CoinGecko Listing
- 2,000 Telegram Members
- CoinMarketCap Listing
- 5,000 Holders

PHASE 2 - GROWTH

- 5,000 Telegram Members
- Website Redesign
- 10,000 Holders
- 10,000 Telegram Members
- List On UniSwap

PHASE 3 - EXPANSION

- GIGA Swap (Decentralised Exchange)
- PancakeSwap
- Initial CEX Listings (Hotbit, Bilaxy, CoinTiger)
- 15,000 Telegram Members
- 30,000 Holders

PHASE 4 - UTILITY

- Listing on kpaymall.io
- Listing on various Ecommerce Platform
- GigaSwap Crate (NFT Marketplace)
- Goo2o (real life Merchandise Store)
- 3 More CEX Listings
- 50,000 Telegram Members
- 100,000 Holders

THE FUTURE OF BIGCASH TOKEN
